

GIPPSLAND AGROFORESTRY NETWORK WOOD LOT PLANNING FIELD DAY

DATE: 28TH AUGUST, 2015
TIME: 2:00PM – 5:00PM
LOCATION: LARDNER PARK, 155 BURNT STORE
ROAD, LARDNER VICTORIA 3820

**Lardner Woodlots,
August 2002**

**13 years on what does the site look like
and is it time to start harvesting?**

This field day is a practical hands-on opportunity for landholders interested in managing the trees on their farms commercially.

The demonstration plots have been neglected for a few years and the group plans to review the plantings and develop a management plan. Network members will host small groups to assess the wood lots and develop plans for their future management. Key to this discussion will be making decisions about when the trees should be harvested.

This is a great opportunity to review your own plans for your own forests and discuss options with local professional forest managers.

Bring sturdy footwear, warm jackets and if possible your safety helmet.

RSVP: contact@gippslandagroforestry.com.au
